Of course the Herald's classification elects the Democratic candidate, and yet that paper professes to feel very doubtful on that point. Commenting on the respective lists it makes the following ob ervations:

The striking feature of this compar The striking feature of this comparison is the near approach to equality in the strength of the two political parties. It shows that the next Presidential election is to be one of the most close and doubtful, and therefore one of the most strennous and exciting, that has ever occurred in the history of our politics. As things now stand, judged by the latest elections in all the States, the Democratie party would elect the next President by the slender majority of seven in the electoral colleges. \* \* The signal Democratic reverses of the present year will prove a fortunate chastisement if they should teach the party a little needed wisdom. There is nothing so marveled wisdom. There is nothing so marvel-ous in our politics as the inability of the Democratic party to bear prosperity. Ever since the close of the war its head Ever since the close of the war its head has been turned by every indication of approaching success. It has uniformly forfeited its chances because it has had no sobriety of judgment when fortune has seemed to beckon it. HOOSAC TUNNEL. Saturday finds me invited to visit the Saturday finds me invited to visit the Hoosac Tunnel, and thither we hied drawn from the Arnold House by intense excitement and a pair of mules, through intensely wintry wind and a storm of "beautiful snow," that, now that I think of it, did not suggest one poetic thought. A mile and a quarter drive and a short walk finds as within and looking out of the biggest bore of this or any other age. When you stand in the west portal of this great work and imagine a hole five miles long, wide enough for a double railway track, through solid granite and mica slate, under a mountain rising 2,600 feet above the level of the sea, you are led to exclaim: "Truly, man is fearfully and wonderfully made," and this hole was fearlessly and wonderfully made by that king amongst men, that nature's nobleman, that man of giant will, that honest, modest gentleman,

Sunday found us like a good boy, attending the M. E. Church and listening to one of the best sermons we ever heard, by the Rev. Farrar, on the text "Have Faith in God." The church edifices here are very fine for such a place, exceeding in some respects anything in our city. The Catholic Church has a chime of belis making a complete octave, by which any tune not exceeding an octave may be "exceuted" in more senses than one if the ringers have no tune or time in their souls. As we walked up street at half-past ten, listening to the chime, we gradsouls. As we walked up street at hali-past ten, listening to the chime, we grad-ually found ourselves in sympathy "with the tintinnabulation that so musically wells from the jingling and the ringing of the bells," saying to our aforesaid selves, "do, re, mi, fa, soi, la, si, do; do, si, la, soi, fa, mi, re, do." Rest.

THE POLITICAL CAMPAIGN. Monday night found the streets alive with brass bands, blowing up listeners to hear Senator Dawes for the Republicans, in the hall connected with my hotel, and Governor Gaston for the Democrats, in Martin's Hall, on the opposite side of the street, in the closing efforts of the political campaign. As I had never seen either of these luminaries, and had no vote, I was a curious and impartial listener, and made myself a numerous auditor by list-made myself a numerous auditor by listwas a curious and impartial listener, and made myself a numerous auditor by listening awhile to the Governor and then to the Senator. The Governor had much the larger audience, and is the more agreeable and argumentative speaker. The Senator had the better brass band, but the worse cold, and is not the equal of our Governor Jacob in good looks, avoirdupois, or as a stump speaker. The Senator was far below my idea of an eloquent man or an able, accomplished Massachusetts alatesman. The Governor's audience was more magnetic, sympathetic

ence was more magnetic, sympathetic and demonstrative; the Senator's more reflective and self-possessed. The ad-herents and admirers of each were respeciful towards the other; positive po-litical convictions, though widely differ-ent, were no disturbance of personal or social relations. In the manner of the adherents of both parties I saw much to admire, nothing to condemn. OVER THE MOUNTAIN.

To-day Mr. Morley Donaldson, an efficient young gentleman, who has for several years been in the service of Mr. Shanley, invited me to take a ride over the mountain. Mr. Shanley gave me his net jacket to put on under my coat. Mr. Sweet, our gentlemanly host, provided me blankets, comfort, and heavy gloves, and thus "done up" and wrapped in buffalor robes, we started up the Hoosac Mountains. By a series of W's or M's we found ourselves ascending the grand old volcanic pile, with mountains in front of is, mountains to the right, to the left and in the rear of us. Off to the right is grand old Grey Lock, rising 3,700 feet above the sea, its crest enshrouded in clouds and covered with snow; to its left, up the valley, is a town in Vermont, while at the foot is North Adams; of the left and town in Vermont, while at the foot is North Adams, with its cotton, shee, and Sweet, our gentlemanly host, provided me blankets, comfort, and heavy gloves, left, six miles up another valley, is a town in Vermont, while at the foot is North Adams, with its cotton, shoe, and numerous other factories, impelled by water power fed by the two branches of the Hoosac river. Down the valley six miles is Williamstown and its college, where ex-Mayor McClellan was graduated, and in the still farther distance stretch the villages, factories, and endless chain of mountains. Now we are 2,200 feet above the aca on the west crest of the Hoosac, while off to the east two and one half miles, lies the East Hoosac, with a mountain valley between, which feannot describe to your readers better than by calling it a great trough on a mountain top, through which flows the sense than the college, and, like the "fser, rolling rapidly." Here we find ice and sleighing, and stones and dwellings, but for my life I cannot expect these farmers have to cultivate but cheerfulness and good nature, for of sail there are not the forest the form of the propose the part of the therefulness and good nature, for of the mail from the West in the forest the form of the propose the part of the propose the propose the land of the college of the propose the land. But I find myself growing so enthusissic over the trip and scenery that my intended brief letter has grown prolix, and I must defer further pen-vent of enthusiasm to another letter, or oral out-pouring, of what I saw at the shalt and on the mountain, for to-morrow I go to Troy, N. Sam Francisco, November 7.—The last dispatch says that ample cause for the coming contest to go in and win, liting in the coming contest to go in and win, liting

upon something more solid than mere "recommendation." We think it is not too early now to commence organization, and we call upon our State Committee to proceed, at the earliest possible time, with the preliminaries. We are determined to win, if possible, otherwise to be defeated with face to the foe. We implore all who love good government, and earnestly desire a triumph of Republican principles, to rally to each and every call which may be made upon them from this time on, and let us oust from power the corruptionists, of high and low degree, now trampling us into the dust.

An important duty devolving upon the Republican party is the selection of their candidates. And it is proper that we should now commence to consider the fitness of those likely to become prominent in the next campaign, that the best men may be thus selected from the many who are desirous of and worthy our favors.

While we are not in any sense professional slate-makers, we have no our mind's eye those whom we should be glad to see nominated to fill the several offices. We present their names below, for the careful consideration of the people of the State, and a nominating convention, should one be held. We sincerely trust it may be the pleasure of the party to select them, though we shall, of course, willingly abide the will of the majority, and cheerfully and earnestly, work for the election of other good men who may be chosen. But to the names of gentlemen we would rejectfully refer the people. For the position of thovernor, we suggest the name of CLL WARD H. LAMAN.

He was previously the editor and proprietor of the West Virginian, published at Fairmont. The West Virginian was Republican in its politics, and was well and ably edited in advocacy of the principles of that party. Mr. Shinn would make an efficient and popular officer if chosen to fill the position named.
